The HOW and WHY of Cybersecurity

PRIMARY WAYS TO PREVENT

EMAILTHREATS

A key way that hackers gain access to organizational data.

PRIMARY POINTS OF ENTRY

Awareness Training

Compromised Passwords

Phishing

Multi-Factor Authentication

Compromised Endpoints

Conditional Access

ENDPOINT ATTACKS

Why do they happen?

Misconfigurations Endpoint and networking device misconfigurations, no least-privilege access.

Weak Passwords

Already compromised or weak passwords, easily accessible, shared accounts.

Zero-Day Attacks

Applications have vulnerabilities that nobody is aware of until an exploit.

INSIDER THREAT PROTECTION

Stepsto prevent this growing cyberthreat.

Reachout for all your cybersecurity needs.
